

THATI AKHIL

Senior Software Engineer

078422 50830 | akhil699125@gmail.com | Hyderabad, Telangana 500047

PROFESSIONAL SUMMARY

Senior Software Engineer with over 7 years of expertise in Python-based backend development, specializing in designing scalable RESTful APIs and building robust cloud-native applications. Highly proficient in leveraging frameworks such as Flask and architecting microservices solutions for optimal performance and scalability. Extensive experience in database optimization, CI/CD pipeline automation, and driving system reliability and performance improvements. Adept at working within Agile methodologies to deliver high-quality, efficient software solutions that meet business objectives and exceed user expectations.

EXPERIENCE

Senior Software Engineer, TCS, June 2025 - Present

Hyderabad, Telangana

- Developed Python notebooks in Microsoft Fabric to extract Power BI Report metadata using Power BI Python APIs.
- Implemented end-to-end logging and monitoring by persisting execution metadata into OneLake.
- Build data ingestion workflows to Power BI metadata into Delta lake for scalable analytics.
- Created and managed Microsoft Fabric Pipeline to orchestrate notebook execution with dependency management.
- Developed and reviewed software documentation to maintain adherence to industry standards and prevent discrepancies.
- Collaborated with stakeholders to identify requirements and develop user stories for new features or enhancements.

Software Engineer, TCS, January 2022 - May 2025

Hyderabad, Telangana

- Designed and developed SDDCAPI, an automation platform enabling consistent and reliable server patching.
- Migrating REST APIs from monolith to microservice architecture, improving scalability and maintainability.
- Optimized database interactions by consolidating connections, achieving a 25% performance improvement.
- Implemented pagination and asynchronous processing using Celery, and robust error handling for APIs.
- Build comprehensive Unit and BDD test suites, improving release stability and reducing production issues.

- Led Bug resolution efforts across QA and Production, ensuring smooth deployment.

Software Engineer, Tech Mahindra, May 2018 - January 2022

Hyderabad, Telangana

- Developed the Enterprise Permission System (EPS) for centralized permission management.
- Designed and implemented RESTful APIs for CRUD operations on users, roles and permissions.
- Built backend services using Python, Flask and PostgreSQL.
- Developed MyRackUI for monitoring and managing EPS operations.
- Implemented CI/CD using Jenkins, improving deployment consistency and speed.
- Applied performance tuning techniques that significantly reduced application response time.
- Collaborate with cross-functional teams in Agile/Scrum environments using Jira.

EDUCATION

Bachelor of Science (B.S.) in Computer Science

Mall Reddy Engineering College, Hyderabad, Apr 2017

SKILLS

- **Backend Development:** Python, Flask, REST APIs.
- **Database:** MySQL, PostgreSQL.
- **ORM:** SQLAlchemy.
- **Cloud and Data:** Microsoft Fabric, Power BI API, Delta Lake, One Lake.
- **Async & Testing:** Celery, Unit Testing, BDD (Behave).
- **DevOps & Tools:** Git, Jenkins, Docker, Jira.
- **Web Technologies:** HTML5, CSS3, JavaScript, Bootstrap, jQuery.
- **Methodologies:** Agile/Scrum, SDLC, UAT, Performance Optimization

LANGUAGES

- **English**
Advanced

AWARDS

- Awarded Star Performer of the month twice in TCS.
